WEB SECURITY TESTING (SAFE TO HOST) CERTIFICATE

Organization Name	: Hamsa Soham Healthcare Private Limited
Web Application Name	: Hamsa Web Application
Temporary Application URL	: https://47.247.56.34/DEMO
Production URL	: https://localhost[server-local-ip]/index.xhtml
Security Testing Start & End Date	: December 3, 2025, to February 27, 2026
Audited By	: Rushali Nikame rushali.nikame@sumasoft.net

Observation: The above web application has undergone Vulnerability Assessment & Penetration Testing and has been certified to be safe from the known vulnerabilities. The contents audited were based on the web application URL mentioned above.

Conclusion: We have tested the Hamsa web application for OWASP Top Ten vulnerabilities based on the OWASP Testing Guide Version 4.2. The said web application is free from OWASP Top Ten 2021 known vulnerabilities and is safe for hosting as on date of submission of the security certificate. The web application has dynamic pages meant to be available to limited users.

MD5 for Root Folder (Zip): f0128d100d8382323b3cfa75e3d40fe7

Recommendations for Hosting the in Production:

1. The Web may be hosted with limited privileges (Without Administrator/Root) of Read and Script Execution permissions.
2. Operating System, Web Server and Database Server hardening needs to be in place for the production server along with encrypted transport layer (SSL) protection.
3. Use the latest version of software technology in the production environment with OEM recommended patches.
Note - The security certificate is valid for

Note - The security certificate is valid for one (1) year from the date of issuance, given that no dynamic changes are made to the API/Web source code. If any alterations, such as modifications to the API/Web code or system configuration, occur, the organization is required to conduct a subsequent VAPT/Security Testing specifically for the modified portion of the APIs/Web.
